**Cyber-Incident dated 26th of February 2024 || claims number 107203**

Dear Sir or Madam,

we refer to your notification of a potential data loss dated 26th of February 2024.  
The company APEX GmbH is co-insured under the contract.

The law enforcement authorities informed you about a possible publication initialized by the hacking group „Monti“ of 100GB of sensible data. This led to our further investigations.

Fortunately, our commissioned IT forensic investigations did not reveal any compromise of your IT systems.

Based on the group's leak page, on which your domain was named, it was initially assumed that it could actually be your company's data. However, the data published 27th of February 2024 on the leak page did not show a match between the systems in terms of system names and IP addresses. On the basis of the IT forensics review of the published data, it was established beyond doubt that it was not data from your company.

Furthermore, your systems were subjected to extensive Thor scans by the IT forensic experts. It revealed no evidence of compromise. The same applies to the protocols, systems, logs and user profiles supplied by you.

Yours sincerely

Janos Alexander
